Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools A.T. Fomenko
Today the methods of applied statistics have penetrated very different fields of knowledge, including the investigation oftexts ofvarious origins. These "texts" may be considered as signal sequences of different kinds, long genetic codes, graphic representations (which may be coded and represented by a "text"), as well as actual narrative texts (for example, historical chronicles, originals, documents, etc.). One ofthe most important problems arising here is to recognize dependent text, i. e. , texts which have a measure of "resemblance", arising from some kind of "common origin". For instance, in pattern-recognition problems, it is essential to identify from a large set of "patterns" a pattern that is "closest" to a given one; in studying long signal sequences, it is important to recognize "homogeneous subsequences" and the places of their junction. This includes, in particular, the well-known change-point prob lern, which is given considerable attention in mathematical statistics and the theory of stochastic processes. As applied to the study of narrative texts, the problern of recognizing depen dent and independent texts (e . g. , chronicles) Ieads to the problern offinding texts having a common source, i. e. , the sameoriginal (such texts are naturally called dependent), or, on the contrary, having different sources (such texts are natu rally called independent). Clearly, such problems are exceedingly complicated, and therefore the appearance of new empirico-statistical recognition methods which, along with the classical approaches, may prove useful in concrete studies (e. g. , source determination) is welcome.

From reader reviews:

Benjamin Ward:

What do you think about book? It is just for students since they're still students or this for all people in the world, the actual best subject for that? Simply you can be answered for that question above. Every person has various personality and hobby for every other. Don't to be compelled someone or something that they don't would like do that. You must know how great as well as important the book Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools. All type of book is it possible to see on many options. You can look for the internet solutions or other social media.

Clemencia Torres:

Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools can be one of your starter books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The article author giving his/her effort to place every word into pleasure arrangement in writing Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools nevertheless doesn't forget the main place, giving the reader the hottest in addition to based confirm resource information that maybe you can be among it. This great information could drawn you into fresh stage of crucial considering.

Jill Williams:

Many people spending their time by playing outside along with friends, fun activity along with family or just watching TV all day long. You can have new activity to shell out your whole day by examining a book. Ugh, do you consider reading a book can definitely hard because you have to use the book everywhere? It alright you can have the e-book, having everywhere you want in your Mobile phone. Like Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools which is getting the e-book version. So , why not try out this book? Let's see.

Barbara Duty:

On this era which is the greater person or who has ability in doing something more are more treasured than other. Do you want to become one of it? It is just simple strategy to have that. What you need to do is just spending your time almost no but quite enough to possess a look at some books. One of the books in the top listing in your reading list is definitely Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating: Volume I: The Development of the Statistical Tools. This book that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking upward and review this reserve you can get many advantages.
