Handbook of Computer Vision Algorithms in Image Algebra

Joseph N. Wilson, Gerhard X. Ritter

Handbook of Computer Vision Algorithms in Image Algebra Joseph N. Wilson, Gerhard X. Ritter
Image algebra is a comprehensive, unifying theory of image transformations, image analysis, and image understanding. In 1996, the bestselling first edition of the Handbook of Computer Vision Algorithms in Image Algebra introduced engineers, scientists, and students to this powerful tool, its basic concepts, and its use in the concise representation of computer vision algorithms.

Updated to reflect recent developments and advances, the second edition continues to provide an outstanding introduction to image algebra. It describes more than 80 fundamental computer vision techniques and introduces the portable iaC++ library, which supports image algebra programming in the C++ language. Revisions to the first edition include a new chapter on geometric manipulation and spatial transformation, several additional algorithms, and the addition of exercises to each chapter.

The authors-both instrumental in the groundbreaking development of image algebra-introduce each technique with a brief discussion of its purpose and methodology, then provide its precise mathematical formulation. In addition to furnishing the simple yet powerful utility of image algebra, the Handbook of Computer Vision Algorithms in Image Algebra supplies the core of knowledge all computer vision practitioners need. It offers a more practical, less esoteric presentation than those found in research publications that will soon earn it a prime location on your reference shelf.

From reader reviews:

Linda Yohe:

In this 21st millennium, people become competitive in every single way. By being competitive now, people have do something to make these people survives, being in the middle of the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the idea for a while is reading. Yeah, by reading a publication your ability to survive improve then having chance to stand than other is high. For you personally who want to start reading the book, we give you this particular Handbook of Computer Vision Algorithms in Image Algebra book as beginning and daily reading reserve. Why, because this book is more than just a book.

Samantha Graham:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their sparetime with their family, or their friends. Usually they performing activity like watching television, planning to beach, or picnic inside park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book is usually option to fill your no cost time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled Handbook of Computer Vision Algorithms in Image Algebra can be great book to read. May be it can be best activity to you.

India Oakley:

This Handbook of Computer Vision Algorithms in Image Algebra is new way for you who has fascination to look for some information mainly because it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know or you who still having small amount of digest in reading this Handbook of Computer Vision Algorithms in Image Algebra can be the light food for yourself because the information inside this kind of book is easy to get by simply anyone. These books develop itself in the form which can be reachable by anyone, that's why I mean in the e-book form. People who think that in book form make them feel sleepy even dizzy this reserve is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss the item! Just read this e-book kind for your better life as well as knowledge.

Paul Evans:

What is your hobby? Have you heard that will question when you got pupils? We believe that that question was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person including reading or as examining become their hobby. You need to know that reading is very important as well as book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update in relation to something by book. Numerous books that can you go onto be your object. One of them are these claims Handbook of

Computer Vision Algorithms in Image Algebra.
