Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing)

Longbing Cao

Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) Longbing Cao
Provides a comprehensive overview and introduction to the concepts, methodologies, analysis, design and applications of metasynthetic computing and engineering. The author: • Presents an overview of complex systems, especially open complex giant systems such as the Internet, complex behavioural and social problems, and actionable knowledge discovery and delivery in the big data era. • Discusses ubiquitous intelligence in complex systems, including human intelligence, domain intelligence, social intelligence, network intelligence, data intelligence and machine intelligence, and their synergy through metasynthetic engineering. • Explains the concept and methodology of human-centred, human-machine-cooperated qualitative-to-quantitative metasynthesis for understanding and managing open complex giant systems, and its computing approach: metasynthetic computing. • Introduces techniques and tools for analysing and designing problem-solving systems for open complex problems and systems. Metasynthetic Computing and Engineering uses the systematology methodology in addressing system complexities in open complex giant systems, for which it may not only be effective to apply reductionism or holism. The book aims to encourage and inspire discussions, design, implementation and reflection of effective methodologies and tools for computing and engineering open complex systems and problems. Researchers, research students and practitioners in complex systems, artificial intelligence, data science, computer science, and even system science, cognitive science, behaviour science, and social science, will find this book invaluable.

From reader reviews:

Tony Caldwell:

What do you concerning book? It is not important together with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have extra time? What did you do? Everybody has many questions above. The doctor has to answer that question since just their can do this. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this kind of Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) to read.

Clare Andrews:

Nowadays reading books are more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book which improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with schooling books but if you want sense happy read one with theme for entertaining for example comic or novel. The Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) is kind of guide which is giving the reader erratic experience.

Ann Macdonald:

Are you kind of hectic person, only have 10 or 15 minute in your time to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short period of time to read it because pretty much everything time you only find publication that need more time to be examine. Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) can be your answer as it can be read by you actually who have those short free time problems.

Miguel Sherman:

A number of people said that they feel uninterested when they reading a reserve. They are directly felt this when they get a half regions of the book. You can choose typically the book Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) to make your own reading is interesting. Your skill of reading talent is developing when you just like reading. Try to choose very simple book to make you enjoy to learn it and mingle the feeling about book and reading through especially. It is to be first opinion for you to like to available a book and examine it. Beside that the publication Metasynthetic Computing and Engineering of Complex Systems (Advanced Information and Knowledge Processing) can to be a newly purchased friend when you're sense alone and confuse in doing what must you're doing of the time.
