Paul Westran

When Stars Collide: Why we love, who we love and when we love them Paul Westran
This book shows why people fall in and out of love. The author, an astrologer and former police crime analyst, finds that the same hidden patterns associated with Venus occur continuously and consistently in the majority of relationships. A study of 1300 celebrity and historical relationships, backed up with details and charts, proves the point. When Stars Collide brings relationship and astrology into context and takes a giant leap forward towards not only understanding how to find out who you will attract, but also when you will attract them.
