**ELECTRICIAN'S BOOK-THE EXPERIMENT OF ELECTRICITY PRODUCTION (20 MODULES SERIES)Permanent magnet and the electromotive force(EMF)** Cornel Barbu
This is "VIDEO" book also helping you to "see live" the process of electricity production.You just have to hit the indicated links and watch an hear the message!
The book is ready to hepl you understand the generation of electricity.INcludes the basics theory in electricity.Is going to help the self-starter electricians , apprentices and any other individuals passionate about the technics .During my working life-time as electrical contractor and engineer I found that most of the electricians I meet will find hard to explain how the electricity is generated. Well established companies do not pay too much attention to the electricians training.IBEW is doing something but not enough.The point is : you need to be a self starter in order to achieve skills to protect yourself and others and be financially well.There is no blame in this is just my intention help them a bit. I know how hard is to support a family, to bring food and things to our loves one since working hard.It remains no time to review and to make theoretical practice in order to understand everything we do.....unless we care about us !You have the option to achieve all modules from 1 to 20 or to choose the ones important for you in order to understand how the electricity is generated. I will encourage you to achieve the complete package and read them step by step as indicated below.:
