**** This disc is for Computer Use Only ****

This collection was born out of necessity, Army leaders realized that heavy fixed artillery required different training programs and tactics than mobile field artillery. The Artillery Corps was divided into two types: field artillery and coast artillery. This Disc covers 493 volumes from 1911 until 2007.

Field Artillery (or FA) is a discontinued bimonthly magazine on the subject of field artillery, published from 1911 to 2007. It was published by the US Field Artillery Association, Fort Sill, Oklahoma and was an official publication of the United States Army Field Artillery Corps. Its intended readership included active and reserve U.S. Army and Marine field artillerymen stationed around the world. In its final years, FA included much discussion of the military operations in both Afghanistan and Iraq.

This is a tremendous research resource on artillery subjects.

From the first edition, January-March 1911 The Field Artillery Journal until the last edition, March-April 2007 Field Artillery, the magazine has been dedicated to the professional development of US Army Field Artillerymen, originally, and then, later, also US Marine Corps Field Artillerymen. It was published under the auspices of the US Army Field Artillery School and Center, Fort Sill, Oklahoma.

As stated in the first edition in 1911, the purpose of the magazine was to disseminate professional knowledge and furnish information as to the artillery's progress, development and best use in campaign; to cultivate with the other arms a common understanding of the power and limitations of each; to foster a feeling of interdependency among the different arms and of hearty cooperation by all; and to promote understanding between the regular and militia forces by forging a close bond-all of which objects are worthy and contribute to the good of our country.
