How to Speed-Up your Windows PC like it's brand new again: Easy steps anyone can do to make your computer as snappy as it was the day you bought it! (Computer tips Book 1) Kevin Meininger

There's a reason the "IT guy" never gets a break...

As an IT professional the #1 favor request I'm always getting from family, friends and coworkers goes something like this: "Hey Kevin, could you take a look at my laptop? I am having a hard time getting anything done because it's going SO SLOW." I smile because I know it's only a matter of time before they approach me like that. "Sure just bring it and I'll take a look."

Most people with a Windows computer have the same problem!

If you use any computer that has Microsoft Windows on it, **you're almost guaranteed to have this "slowing down" problem**; if not today then certainly some day in your future. You'll know when that day comes because your attitude towards your PC will change to frustration. Nobody likes to feel unproductive working on their computer, or to feel like using it is a chore.

The good news is that, over my career working in the tech industry, I've learned how to combat this problem. It's really not difficult at all and **anyone could learn these tips!** You just have to periodically do a little "house cleaning" on your system, or it will gradually grind slower and slower with each day you use it. I've halfway wondered if the PC makers do this on purpose so you'll get fed-up and want to buy a new computer...

This book shows you how to fix and speed-up your own computer right away

Each chapter gives you solid, proven steps you can do **without having to hire someone**. Each step will rejuvenate your computer's mojo a bit more and you'll be able to notice the **improvements right away!** These steps are not really "tricks" to make your computer faster; they are **fixes for known problems** with Windows operating systems. I show you how to cleanup the mess and get your computer back to the snappy speed you had when you first bought it!

Anyone can do this! Get it done quickly in about an afternoon - for FREE!

I've tried to write these chapters in a non-technical tone that even my mom could follow :) You should be

able to complete most of the steps in about an afternoon. But beware: once your friends find out about your new skills, you might suddenly get a lot more favor requests... (sidenote: you'll know you've achieved expert status if people start bringing their laptops to holiday dinners!)

- Chapter 1. Your computer might be sick
- Chapter 2. Free is no fun with strings attached
- Chapter 3. Gremlins running under the radar
- Chapter 4. Does your browser need to go on a diet?
- Chapter 5. Imagine your world without commercials
- Chapter 6. A scatter-brained computer is no good for anyone

These tips for speeding-up your computer **work for all versions of Windows** including XP, Vista, 7, 8 and 10.
