It examines the common-law remedy of nuisance, the matrix of so much of environmental law and still a significant cause of action, and goes on to look at land-use controls, with particular emphasis on critical areas-landmarks, wetlands, coastal resources-and the de facto taking issue. Air and water quality, waste, toxics and the other areas of comprehensive statutory control, the National Environmental Policy Act, electric generation, and the increasingly important area of international environmental law are also discussed.

Since the Third Edition was published three years ago, much has occurred in this fast-shifting field. Several important decisions have dealt with air and water quality and international issues such as global warming have expanded. The Third Edition reflects these recent events.
