Intelligent Information Systems 2002

Intelligent Information Systems 2002
This volume contains articles accepted for presentation during The Intelligent Information Systems Symposium IIS'2002 which was held in Sopot, Poland, on June 3-6, 2002. This is eleventh, in the order, symposium organized by the Institute of Computer Science of Polish Academy of Sciences and devoted to new trends in (broadly understood) ArtificialIntelligence. The meetings started back to 1992. With small initial audience, workshops in the series grew to an important meeting of Polish and foreign scientists working at the universities in Europe, Asia and the Northern America. Over years, the workshops transformed into regular symposia devoted to latest trends in such fields like Machine Learning, Knowledge Discovery, Natural Language Processing, Knowledge Based Systems and Reasoning, and Soft Computing (i.e. Fuzzy and Rough Sets, Bayesian Networks, Neural Networks and Evolutionary Algorithms). At present, about 50-60 papers are accepted each year. Besides, for several years now, the symposia are accompanied by a number of tutorials, given by the outstanding scientists in their domain. The main topics of this year symposium included: • decision trees and other classifier systems • neural network and biologiccally motivated systems • clustering methods • handling imprecision and uncertainty • deductive, distributed and agent-based systems We were pleased to see the continuation of the last year trend towards an increase in the number of co-operative contributions and in the number and diversity of practical applications of theoretical research.

From reader reviews:

Dorothy Marsh:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a reserve. Beside you can solve your condition; you can add your knowledge by the book entitled Intelligent Information Systems 2002. Try to make book Intelligent Information Systems 2002 as your good friend. It means that it can being your friend when you sense alone and beside that course make you smarter than previously. Yeah, it is very fortuned to suit your needs. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience in addition to knowledge with this book.

Karen Rodriguez:

Hey guys, do you would like to finds a new book to read? May be the book with the subject Intelligent Information Systems 2002 suitable to you? The particular book was written by well known writer in this era. The book untitled Intelligent Information Systems 2002is the one of several books that everyone read now. This kind of book was inspired a number of people in the world. When you read this guide you will enter the new dimensions that you ever know previous to. The author explained their strategy in the simple way, so all of people can easily to recognise the core of this book. This book will give you a lot of information about this world now. In order to see the represented of the world in this book.

Robert Knight:

Many people spending their moment by playing outside having friends, fun activity along with family or just watching TV all day long. You can have new activity to invest your whole day by reading a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Smart phone. Like Intelligent Information Systems 2002 which is finding the e-book version. So , try out this book? Let's notice.

John Smithers:

Is it you actually who having spare time after that spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Intelligent Information Systems 2002 can be the respond to, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?
