This comprehensive electronic book on DVD-ROM presents a complete collection of all 49 volumes of the historic "Pentagon Papers" released in June 2011. The Pentagon Papers, officially titled "Report of the Office of the Secretary of Defense Vietnam Task Force", was commissioned by Secretary of Defense Robert McNamara in 1967. In June of 1971, small portions of the report were leaked to the press and widely distributed. However, the publications of the report that resulted from these leaks were incomplete and suffered from many quality issues. On the 40th anniversary of the leak to the press, the National Archives, along with the Kennedy, Johnson, and Nixon Presidential Libraries, released the complete report. The 48 boxes in this series contain a complete copy of the 7,000 page report along with numerous copies of different volumes of the report, all declassified. Approximately 34% of the report is available for the first time. What is unique about this, compared to other versions, is that: The complete Report is now available with no redactions compared to previous releases. The Report is presented as Leslie Gelb presented it to then Secretary of Defense Clark Clifford on January 15, 1969. All the supplemental back-documentation is included. In the Gravel Edition, 80% of the documents in Part V.B. were not included. This release includes the complete account of peace negotiations, significant portions of which were not previously available either in the House Armed Services Committee redacted copy of the Report or in the Gravel Edition To supplement the Pentagon Papers reproduction, as a bonus we've included our unique and complete collection of newly declassified documents, intelligence reports, histories and reports from the Office of the Secretary of Defense and Joint Staff about the Vietnam War and Southeast Asia. This treasure-trove of nearly 20,000 pages covers many vital topics; there are over 150 unique documents reproduced in this collection. This incredible DVD-ROM is packed with over 26,000 pages reproduced using Adobe Acrobat PDF software - allowing direct viewing on Windows and Macintosh systems. The Acrobat cataloging technology adds enormous value and uncommon functionality to this impressive collection of government documents and material. This DVD-ROM disc is for use in a computer DVD drive. The files can be accessed from the File Explorer in the same way that you open files from a CD-ROM disc; the CD-ROM and DVD-ROM formats are functionally the same, but the DVD has more than six times greater storage capacity. Of course, this disc cannot be "played" in a DVD player connected to a television set. It contains computer-formatted data, not video. Our news and educational discs are privately compiled collections of official public domain U.S. government files and documents - they are not produced by the federal government. They are designed to provide a convenient user-friendly reference work, utilizing the benefits of the Adobe Acrobat format to uniformly present thousands of pages that can be rapidly reviewed, searched by finding specific words, or printed without untold hours of tedious research and downloading. Vast archives of important public domain government information that might otherwise remain inaccessible are available for instant review no matter where you are. This book-on-a-disc format makes a great reference work and educational tool. There is no other reference that is as fast, convenient, comprehensive, thoroughly researched, and portable - everything you need to know, from the federal sources you trust
